Product Description

60cm*10m Wood Texture Self Adhesive Plastic Film Ideal for Refurbished Furniture for Home

Product Description:

Our self adhesive pvc film is primarily composed of polyvinyl chloride, a synthetic plastic material known for its durability and versatility. We add a layer of pressure sensitive adhesive on the back of the pvc film, and the liner paper. The liner paper is removed before application. The adhesive is designed to bond securely to a variety of surfaces, including glass, metal, plastic, wood, and so on. The film can be made different thickness, depending on specific application and durability requirements. Also, it is available in a variety of finishes, including glossy, matte, satin, and textured finishes. Moreover, it can also be found in a wide range of colors and patterns, such as wood grain design, marble design, brick design and so on. Our self adhesive pvc film has a broad range of applications, such as covering walls, furniture, and so on. And it is also popular choice for various craft and DIY applications due to its ease of use.

Features:

Product Name: Self Adhesive PVC Film
Design: Wood Grain, Marble, Brick, Stone, Plain Color Etc.
Waterproof: Yes
Durability: Excellent
Material: PVC
Adhesive: Acrylic Pressure Sensitive Adhesive
Ideal For: Adhesive Contact Paper, Self Adhesive Furniture Film, Furniture Wrap

Technical Parameters:

Our products come in a range of thicknesses, from 0.1mm to 0.12mm, and in two widths--1220mm and 600mm. We offer two lengths of roll--50m and 10m--allowing for maximum customization. We also offer various design choices, from wood grain and solid colors to marble and brick, with a number of surface treatments available, such as matt, super matt, embossed, high gloss, and soft touch. And, lastly, as a customer, you can enjoy our excellent OEM and ODM services.

Applications:

Self-adhesive PVC film is a versatile material that can be used for various applications, including home improvement, crafts, signage, and more. Here's a general guide on how to apply self-adhesive PVC film:

Materials you'll need:

Self-adhesive PVC film

A clean, smooth surface to apply the film to (e.g., furniture, walls, windows, or any other suitable surface)

A measuring tape or ruler

A sharp utility knife or scissors

A squeegee or a credit card

A clean cloth or sponge

A spray bottle with soapy water (optional)

Steps for application:

Prepare the surface: Ensure that the surface you plan to cover with self-adhesive PVC film is clean, dry, and smooth. Remove any dust, dirt, or imperfections. If the surface is dirty, clean it thoroughly and let it dry completely.

Measure and cut: Measure the dimensions of the surface you want to cover and add a few extra inches to each side to allow for trimming. Cut the self-adhesive PVC film to the desired size using a sharp utility knife or scissors. Be precise in your measurements and cutting to ensure a proper fit.

Peel off the backing: Carefully peel back a few inches of the backing paper from one end of the PVC film. Avoid touching the adhesive side to prevent fingerprints and dirt from sticking to it.

Apply the film: Begin applying the exposed adhesive side of the PVC film to the surface. Start at one corner or edge and align it with the surface. As you apply the film, gradually peel off more of the backing paper, smoothing the film onto the surface as you go. You can use a squeegee or a credit card to help remove any air bubbles and ensure a smooth, even application.

Smooth out bubbles: If you notice any air bubbles trapped under the film, use the squeegee or credit card to gently push them out towards the edges. Work from the center outward to expel the bubbles completely.

Trim excess: Once the film is applied smoothly, use a utility knife or scissors to trim any excess film along the edges. Be cautious when cutting to avoid damaging the surface underneath.

Finish and clean: After trimming, go over the entire surface with a clean cloth or sponge to ensure that the PVC film is securely adhered and free from any air bubbles or wrinkles. If you used soapy water during application, wipe away any excess

water or soap residue.

Final inspection: Inspect the surface to ensure that the PVC film is securely in place and free from imperfections. If you encounter any issues, gently lift the film and reapply as needed.

Self-adhesive PVC film can be used for a wide range of purposes, so make sure to follow the specific instructions provided by the manufacturer if you have a unique application in mind. Proper surface preparation and careful installation are key to achieving a professional-looking result.

Customization:

Self Adhesive PVC Film

Brand Name: **Realsun Deco**

Place of Origin: **Foshan, China**

Minimum Order Quantity: **3000m/model**

Price: **Negotiable**
