- Usage: Lamination, Vacuum Membrane Press, Wrapping, Hot Press And So On
- Length: 100m-400m/roll
- Material: PVC
- Highlight: **Soft Touch PVC Lamination Film, PVC Lamination Film Roll Multipurpose, Anti Scratch pvc film lamination**

Product Description

Product Description:

Our **PVC foil** offers excellent performance and aesthetics. The primary ingredient of our product is Polyvinyl Chloride (PVC), a synthetic plastic that is both strong and flexible. Not only is it easy to process, it also provides a range of colors, textures, and patterns, all of which can imitate real materials such as wood, stone, cloth, or metal while being more economical.

Our film is suitable for use on a variety of surfaces, such as walls, doors, cabinets, and furniture. It is renowned for its durability and resistance to wearing, making it a popular choice for high-traffic areas. In addition, its low maintenance requirements mean that cleaning is only required once a week with a damp cloth.

It also has excellent cost savings when compared to natural materials, while still providing sophisticated aesthetics. Furthermore, with a wide variety of styles and finishes available, our PVC foil can be adapted to suit project requirements and individual design preferences. It is commonly used for wall paneling, furniture surfaces, retail displays, interior doors, kitchen and bathroom cabinets, and various other applications.

Features:

Service: OEM, Customized Design And Size

Technical Parameters:

Description of Aluminium Composite Panel

Aluminium composite panels are commonly used as an attractive and durable finish for building exteriors or interior decorations. It is made of two aluminium sheets sandwiching a core material. The thickness of the panel ranges from 0.1mm to 0.5mm, and its width can be 1260mm or 1400mm, with the length of each roll varying from 100m to 400m. The design of the panel can be customized to have wood grain, solid colors, marble, brick and other patterns. Additionally, the surface treatments can be matt, super matt, embossed, high gloss, or soft touch, making it more vivid and appealing. The panel is available for OEM or ODM services.

Packing and Shipping:

Packaging and Shipping of PVC Lamination Film

PVC Lamination Film products must be handled with great care and be stored in a cool, dry environment. The products should be in an upright position to prevent damage. The products must be stored on pallets, and not on the ground, to prevent contamination or damage to the products.

When shipping, the products must be securely wrapped and sealed to ensure they do not shift during transit. It is important to ensure that the products are not exposed to extreme temperatures, moisture, or dust during shipping.
